

DIVYUM BHUMRA

Lead Engineer | Product Engineering | Frontend Architecture

Remote, India • divz7777@gmail.com • divyumbhumra.com

LEADERSHIP PROFILE

Product-minded engineering leader with 7+ years of experience turning ambiguous requirements into reliable, customer-facing software. Leads Denim Health initiatives from discovery and PRDs through architecture, sprint execution, UAT, production rollout, and post-release support. Combines deep React and TypeScript expertise with client partnership, cross-functional leadership, and a record of improving performance, quality, and delivery confidence. Experienced building and guiding distributed teams across product, design, backend, QA, and customer-facing functions.

CORE LEADERSHIP & TECHNICAL EXPERTISE

Product leadership	Discovery, PRDs, user flows, roadmaps, prioritization, feature scoping, customer feedback, release planning
Engineering leadership	Frontend architecture, technical strategy, mentoring, code reviews, estimation, quality, performance, accessibility
Delivery	Agile/Scrum, Jira, backlog refinement, dependencies, milestones, QA, UAT, defect triage, production releases
Frontend	React, TypeScript, JavaScript (ES6+), Next.js, Vite, Redux, Chakra UI, Storybook, HTML, CSS/Sass
Quality & platforms	Playwright, Jest, Enzyme, Auth0, Nx, Webpack, CI/CD, Azure App Service, Web APIs, Web Vitals, PWAs

PROFESSIONAL EXPERIENCE

Senior Software Engineer / Lead Engineer | Denim Health 2023–Present
Remote, India

- Progressed into a lead frontend and UX role in 2025; now own product initiatives end-to-end—from client discovery, requirements, PRDs, user flows, and technical planning through development, QA, UAT, production rollout, and post-release support.
- Partner directly with client stakeholders to understand operational workflows, turn feedback into prioritized product decisions, resolve issues, and align upcoming releases.
- Lead frontend architecture and delivery with React, TypeScript, Vite, Chakra UI, Auth0, and Playwright; contribute hands-on to implementation, debugging, refactoring, and UX decisions.
- Build complex healthcare workflows spanning providers, practices, search, filters, maps, schedules, closures, and operational data.
- Reduced frontend API traffic in key workflows from 40+ requests to approximately 10–12, improving performance and simplifying client-side orchestration.
- Established Playwright end-to-end coverage for critical user journeys, increasing release confidence and reducing manual regression effort.
- Drive sprint execution in Jira across backlog refinement, prioritization, estimation, dependencies, milestones, defect triage, and release readiness.
- Coordinate UAT validation, production rollouts, release notes, and cross-functional communication across engineering, product, UX, customer-facing teams, and client stakeholders.

Software Development Engineer 3 | CAW Studios Oct 2022–Jun 2023
Hyderabad, India

- Led frontend development for Calibrate, a multilingual coding-assessment platform with proctoring, candidate verification, cheating detection, live hiring events, and an autocomplete-enabled coding environment.
- Shaped product strategy, feature prioritization, and frontend architecture while managing sprints and the Jira board; helped the platform support live hiring events and attract 10,000+ users.
- Led a cross-functional team of 3–4 frontend engineers, 2 QA engineers, and 1 designer; mentored engineers, reviewed code, and coordinated production deployments.
- Established the frontend foundation for Celito, a B2B biotech SaaS product, using React, TypeScript, Fluent UI, Webpack, Storybook, and an MVC architecture.

Software Engineer | Topica Edtech Group Nov 2021–Oct 2022
Gurugram, India

- Owned and delivered React and Next.js features for Edumall, a short-skills learning platform serving Thailand, Indonesia, and Vietnam.
- Contributed to a product-wide design refresh that strengthened the learner experience for a platform receiving 200,000+ site visits.

Frontend Engineer | Independent / Remote**Feb 2020–Sep 2021***India*

- Built Zollege, a college-search platform, from the ground up with Next.js; the product grew to more than 2.5 million site visits.
- Delivered new workflows and translated Figma designs into production React interfaces for a hotel-management SaaS product.
- Built a React application for IceCap Group's loan-underwriting workflow and configured delivery through Azure Pipelines and Azure App Service.

UI Developer Intern | XenonStack**Jul 2019–Jan 2020***Chandigarh, India*

- Revamped XenonStack's careers portal with React, Redux, and Sass, contributing to a 5x increase in job applications.
- Developed and documented reusable design-system packages; added unit coverage with Jest and Enzyme and automation coverage with Taiko.

LEADERSHIP BEYOND ENGINEERING

President | Rotaract Club Chandigarh Himalayan**Jun 2018–Jun 2019***Chandigarh, India*

- Led an 800+ member service organization, overseeing programs, people policies, team structure, budgets, marketing, and external representation; raised INR 10 lakh for community initiatives.

Team Leader | Smart India Hackathon 2018, Government of India**Jan 2018–May 2018***National Finalist*

- Led e-Rozgaar, an online file-tracking system for government offices, to the national finals from a field of 12,000+ teams.

EDUCATION

PG Diploma in Product Management, Pragmatic Leaders (Y Combinator-backed)**2021–2022****Bachelor of Engineering in Information Technology, UIET, Panjab University****2015–2019**
